MICRO DESERT EAGLE™ PISTOL

ACCURATE. RELIABLE. INVISIBLE.

WEIGHS LESS THAN 14 OZ.

Sharing all the family traits of the world-famous Desert Eagle® Pistol, Magnum's Micro Desert Eagle™ pistol, chambered in .380 ACP, is the ultimate in compact personal protection. Small enough to nest comfortably at home, in a pocket or in a purse, the double action only Micro Desert Eagle™ is proudly made in the U.S. and weighs less than 14 oz. But don't let its size fool you. The Micro Desert Eagle™ provides big-time protection with a gas-assisted blowback system for ultimate reliability and amazing accuracy. Which only goes to prove that good things do indeed come in small packages.

WORLD’S MOST POWERFUL PISTOL. THE DESERT EAGLE®

A true classic fits any style. After 25 years of being accessorized, customized and re-imagined in countless movies, television shows and video games, the Desert Eagle® Pistol has emerged as a pop-culture icon. Now this American classic is proudly made right here in the U.S.A. at our manufacturing facility. You can customize your Desert Eagle® with the finish of your choice to add your own distinctive twist to this timeless firearm.

Standard & Custom Finishes

Standard finish is black. Pistols pictured to the right have 6-inch barrels, but all finishes shown are also available for Desert Eagles with 10-inch barrels.

The .50 Action Express is recommended for experienced shooters.

THE PLATFORM/ THE DESERT EAGLE® PISTOL

The entire Mark XIX Component System is based on a single platform. With its gas operation, rotating bolt and all-steel construction, this is the heart of the firearm. Once you've purchased a Mark XIX Desert Eagle® Pistol, you can change the barrel length or the caliber in seconds, if you have the appropriate Mark XIX components on hand.

The Mark XIX Desert Eagle® Pistol offers true interchangeability. Six different pistols are available — .357 Magnum, .44 Magnum or .50 A.E., each with a 6-inch or 10-inch barrel. Purchase one pistol and you have the platform to build the other five with a simple switch of components (barrel, magazine and sometimes bolt assembly).

TECHNICAL DATA

General Features

- The Desert Eagle® Pistol is a gas-operated, semi-automatic pistol with a rotating four lug bolt for positive lock-up.
- The barrel is locked in place, assuring a high degree of accuracy.
- The polygonal rifling reduces barrel wear, is easy to clean and very accurate.
- Anatomically formed grip, ideal hand seating angle and comfortable grip dimensions permit rapid, accurate, instinctive shooting. The Desert Eagle® is designed for two-handed shooting.
- The Desert Eagle® Pistol fires standard factory ammunition.
- DEP's have an automatic slide lock that holds the slide open after the last shot is fired.
- The 7/8" dovetail rib on the barrel has cross slots to accommodate scope rings (available as an option).

Safety

The safety is ambidextrous — it can be operated by right-handed and left-handed shooters. When the safety is on, the firing pin is blocked, disconnecting the trigger bar from the sear at the same time. Extensive testing has shown the Desert Eagle® is safe from accidental firing with safety engaged.

Construction

Desert Eagle® Pistol parts are machined or precision-cast and machined to strict military standards from high-quality steel.

PRACTICAL ACCESSORIES. EXCLUSIVE UPGRADES.

Hogue® Rubber Grips

Soft synthetic rubber grips have cobbledstoned texture for secure hold. One-piece (DEP821) with finger grooves, on right, and two-piece (DEP820) no finger grooves, on left, retrofit Mark I, VII and XIX. Both styles field-installable. Made exclusively for the Desert Eagle® by Hogue® Grips.

Desert Eagle® Sights

Low-profile Millett® sights with white or orange front ramp and white rear sight are adjustable for windage and elevation. Trijicon® night sights, 3-dot green front/rear: the brightest, strongest and safest for enhancing night fire accuracy. Sights work in sets (not individually) on all Desert Eagle® models. Front sights are also available separately for your extra barrels.

New HiViz™ fiber-optic front sight is ideal for low-light conditions or dark targets like a wild hog or black bear. Each comes with 3 green and 3 red LitePipes. Available for 6-inch or 10-inch barrels. An alternative to the Desert Eagle® factory front sight.

For all Desert Eagle® sights, some fitting is required. Consultation with your gunsmith is suggested. Magnum Research does not warranty sights not installed by a MRI factory gunsmith.

TECHNICAL DATA

- Receiver: Machined 6061-T6 aluminum (aircraft aluminum). 3x stronger than Cast 380 aluminum. Anodized finish is hard and durable. Consistent machining results in consistent accuracy.
- Bolt: CNC-machined, through-hardened 4140 steel. Consistent dimensions for consistent performance. Minimum-depth bolt face (.043") maximizes accuracy.
- Barrel: 18-inch straight bull barrel made from 4140 steel. Benz chamber and 11-degree crown. Tapered throat area aligns bullet perfectly with the bore to maximize accuracy.
- Firing Pin: Inertia firing pin. Inertia system is preferred for the most accurate firearms.

Magnum Research's patent-pending gas-assisted blowback system eliminates problems related to time-to-peak-pressure issues with .22 WMR ammo. Gas-assisted blowback is safe and reliable, and it promotes accuracy. This feature is found on all .22 WMR rifles.

The small hole in front of the chamber bleeds a small amount of expanding gas as the bullet passes it.

Patent-pending gas block (2-1/2" long) disperses the expanding gasses and diffuses them safely and quietly.

ACCURATE. INNOVATIVE. AFFORDABLE.

ANY MAGNUM FIREARM

Custom-Jeweled Components

This custom finish offers a relatively inexpensive way to jazz up the components of your Magnum Research firearm. The prices listed are for jewelring your components, which you will have to ship to Magnum Research at your own expense.

CUSTOM JEWELING OF SAFETY LEVERS	(DEP)	GS-JEWL-SL	\$15.00
CUSTOM JEWELING OF HAMMER	(DEP)	GS-JEWL-H	\$15.00
CUSTOM JEWELING OF TRIGGER	(DEP, BFR)	GS-JEWL-T	\$10.00
CUSTOM JEWELING OF BOLT ASSEMBLY	(DEP, MER)	GS-JEWL-B	\$40.00
CUSTOM JEWELING OF OTHER COMPONENTS	(DEP, MER)	GS-JEWL	CALL
INSTALL TRIGGER STOP (ON YOUR TRIGGER)	(DEP)	GS-TS	\$20.00

*Only brushed chrome, polished chrome, and bright nickel Desert Eagle finishes can be jeweled. Why not the other finishes? Matte chrome and satin nickel are too dull to jewel, 24K gold is too soft and titanium is too hard to jewel, and the polished & blued finish is susceptible to rust if jeweled.
